Profile

Senior Full Stack Developer with 8+ years of experience building, maintaining, and improving production applications. Experienced in designing scalable solutions, optimizing application performance, modernizing legacy systems, and delivering reliable software across the full development lifecycle. Strong background in working with complex systems and collaborating with cross-functional and international teams.

Skills

Backend: PHP, Laravel, CodeIgniter, FuelPHP, Node.js, Express.js, REST APIs

Frontend: JavaScript, TypeScript, React.js, Vue.js, AngularJS, Inertia.js, jQuery, HTML, CSS

Databases: MySQL, MongoDB, Firestore, Elasticsearch

Cloud & DevOps: AWS, Fly.io, Docker, OpenTofu, Git

Employment History

Senior Full Stack Developer

Teamified, Inc. | Deployed to: GFP Events

Jul 2024 - Present

- **Graduation Service Australia (GSA)**
 - Develop and maintain API endpoints supporting internal and external platforms.
 - Build and maintain frontend functionality for production systems supporting graduation-event operations.
 - Provision AWS application instances using OpenTofu Infrastructure as Code and manage test-environment deployments through Fly.io.
 - Develop and maintain unit and integration tests using PHPUnit and Jest/Vue Test Utils across backend and frontend systems, including legacy AngularJS applications.
 - Develop and deploy a React Native mobile application for scanning student and guest-ticket QR codes using Expo and EAS.
 - Integrate Stripe payment processing to support secure customer checkout and online orders.
 - Collaborate with the CTO and product manager to align technical deliverables with business requirements and release schedules.

Software Developer

Bizmates, Inc.

Feb 2022 – July 2024

- **GitTap – Job Matching Platform for Highly-Skilled Foreign IT**
 - Designed and developed API endpoints supporting internal and client-facing applications.
 - Improved search functionality and application performance through relational-database optimization and Elasticsearch integration.
 - Maintained and enhanced background queue-processing pipelines by implementing new functionality and performance improvements.
 - Developed unit and integration tests using PHPUnit to improve application reliability and maintainability.
 - Integrated third-party services, including social authentication and Daxtra Parser.
 - Applied SOLID principles to maintain clean, scalable, and maintainable application architecture.
- **Bizmates – Learning Management System**
 - Optimized complex database queries to enhance application performance and reduce latency.
 - Designed and developed a custom queue system to efficiently handle large-scale report generation.
 - Maintained and refactored a legacy codebase to improve stability and maintainability, while reducing technical debt and enhancing overall code quality.
 - Participated in sprint planning, estimation, and retrospectives within an Agile development environment.

PHP Developer

Global Quest Consulting Group, Inc | Deployed to: United Laboratories, Inc.

Feb 2021 – Feb 2022

- **Human Resource System | Website CMS**

- Maintained and enhanced CodeIgniter applications supporting HR and content-management systems.
- Designed and optimized database structures to improve application performance.
- Developed API endpoints supporting mobile applications.
- Managed QA and production environments using Plesk.
- Collaborated with business analysts and project managers to coordinate requirements and release schedules.

Software Engineer

Mar 2020 – Feb 2021

Mobile Group, Inc.

- Developed reusable frontend components and application functionality using React.js and Vue.js.
- Built a drag-and-drop seat-mapping feature for a concert-ticketing platform using jQuery.
- Developed backend CRUD functionality using Node.js, Express, Firebase, Firestore, and MongoDB.
- Built analytics dashboards using Chart.js and Highcharts.js.
- **Projects:**
 - SM Ticket (Promoters Portal)
 - Social Media Ticketing System
 - Rampver Financials - Digital Investment System
 - General Appropriations Act – Analytics System

Sales Analyst

Nito's Enterprises Corporation

Jun 2019 – Feb 2020

- Analyzed and reported sales data, coordinated customer orders, monitored sales performance, and maintained inventory and invoice records.

Software Engineer

Dec 2017 – Jun 2019

Telcom Live Content, Inc.

- Developed web applications using the CodeIgniter HMVC framework.
- Designed database architectures and user interfaces for government and enterprise applications.
- Collaborated with developers, team leads, and QA engineers to deliver production software.
- Visited client sites to deploy applications on physical servers and provide on-site technical support.
- **Projects:**
 - Agricultural Credit Policy Council – Motor Pool System
 - Department of Health – Mobile Health System
 - Metropolitan Manila Development Authority – CMS
 - Matrex Information System – CMS
 - Philippine Drug Enforcement Agency – Operations Reports Management System

Education

Bachelor of Science in Information Technology major in Web Development

AMA Computer College, Cabanatuan City, Nueva Ecija, Philippines

May 2014 – Apr 2017
